A Tradition of Excellence...
Since 1923

Wilson & Hampton provides the premier system for coating metal surfaces. Electrostatic painting is an efficient process where you can upgrade and rejuvenate your entire office or factory area in your choice of finishes - at a fraction of the re-placement cost. Furniture, lockers, machinery and much more can be painted in-shop or on-site by drawing the paint directly to the metal surface to be painted and "wrapping" around it, leaving no drips, spatter, or overspray.
